

Section 17.24.317

DIVERSIONS

Details regarding design, construction, operation and maintenance of diversions pursuant to this rule are contained in Appendix K "Drainage Control Plan: Ponds, Impoundments, Diversions". Supporting information (design and as-built drawing) is presented in Appendix Ka and Kb. Appendix Kc provides drainage control for the Pit 4 area including any diversions that are planned. Prior to construction, descriptions (including maps and cross sections) for all stream channel diversions and other diversions proposed for construction within the mine permit area will be submitted to the MDEQ. All diversions will comply with performance standards and design criteria of Sections 17.24.635 through Sections 17.24.637.
