

Section 17.24.607

MAINTENANCE OF ROADS AND RAILROAD LOOPS

(1) Routine Road Maintenance Requirements

All roads will be routinely maintained such that the required design standards are maintained throughout the life of the operation.

(2) Maintenance of Drainage Structures

SCCC will keep drainage structures for roads and railroad loops free of blockage and in working condition, unless otherwise approved by MDEQ for the following reasons:

- (a) the structures cannot be maintained due to wet conditions.
- (b) obstructions to structures will not result in environmental damage or imminent harm to the health and safety of the public: and
- (c) runoff and sediment are contained in accordance with the approved drainage control plan.

(3) Use of Damaged Roads or Embankments

Roads or embankments severely damaged by natural or man-made events will be reconstructed or reclaimed as soon as practicable after the damage has occurred.
