

Section 17.24.718

SOIL AMENDMENTS AND OTHER MANAGEMENT TECHNIQUES

(1) Use of Soil Amendments

Fertilization may be practiced where soil substitutes are the growth media. An arbuscular mycorrhizal inoculant may be used to promote sagebrush survival.

(2) Use of Other Means to Establish Vegetative Cover

SCCC will use normal husbandry practices to promote revegetation that will support designated land uses (Section 17.24.313(1)(h)(ii)).

(3) Management Practices

Management practices will not impede revegetation.
