

Section 17.24.635

GENERAL REQUIREMENTS FOR TEMPORARY AND PERMANENT
DIVERSION OF OVERLAND FLOW, THROUGH FLOW,
SHALLOW GROUNDWATER FLOW, AND EPHEMERAL,
INTERMITTENT AND PERENNIAL STREAMS

All details for existing and planned diversions are addressed in Appendix K, "Drainage Control Plan: Ponds, Impoundments, Diversions".

- (1)(a) No diversions have been required by MDEQ.
- (1)(b) All diversions will be designed and utilized to protect water quality, quantity and related environmental resources.
- (2) All diversions will be designed to avoid potential for landslide. No discharges from diversions will be diverted to underground mines, as no underground mines are present within the SCCC mine permit area.
- (3) Diversions will not be designed or constructed which will pass large flows to an adjacent channel.
- (4)(a) All diversions will be designed, constructed and maintained to prevent degradation of water quality.
- (4)(b) All diversion designs will be submitted to MDEQ for review and approval prior to construction.
- (5) All diversion designs will be certified by a qualified licensed professional engineer.
