

Section 17.24.641

ACID- AND TOXIC-FORMING SPOILS

(1) Spoil Detrimental to Vegetation or Water Quality

Negative impacts to vegetation and water quality from acid and toxic forming materials will be prevented.

(2) Preventing Contact with Water

Drainage into ground and surface waters from acid and toxic forming spoil will be avoided by preventing water from coming into contact with such material in accordance with Sections 17.24.501(3), 17.24.504, 17.24.507, and by other methods required by the MDEQ.

(3) Burial or Treatment Within 30 Days

Drainage into ground and surface waters from acid and toxic forming spoil will be avoided by burying or otherwise treating acid forming or toxic forming spoil within 30 days after it is first exposed on the minesite unless otherwise approved by the MDEQ.
