

Section 17.24.647

TRANSFER OF WELLS

With prior approval of the Department, SCCC may allow the surface owner to use a prospecting well or monitoring well as a water supply well. To obtain Departmental approval, the surface owner must submit a written request for transfer and evidence that the well meets or exceeds compliance standards established by the Department and the MT Board of Water Well Contractors. SCCC remains responsible for proper management of the well and site until final bond release.
