CHARGER CONSOLES & COMPUTER MOUNTS

CC-B-CHB-14 WITH CM-UMNT-SA-LT IN 2012 CHARGER

CC-B-CH22 IN 2012 CHARGER

Troy offers four (4) Charger-specific console designs:

CC-B-CH22 (flat, no slope), CC-B-CHB14/CC-B-CHB18 (6" slope), CC-B-CHLP14 (low profile) and CC-B-CHDM-16 (for dash mounts). Any of these console designs also can be modified to be lengthened, shortened, raised in height. We will customize to accommodate your specific applications.

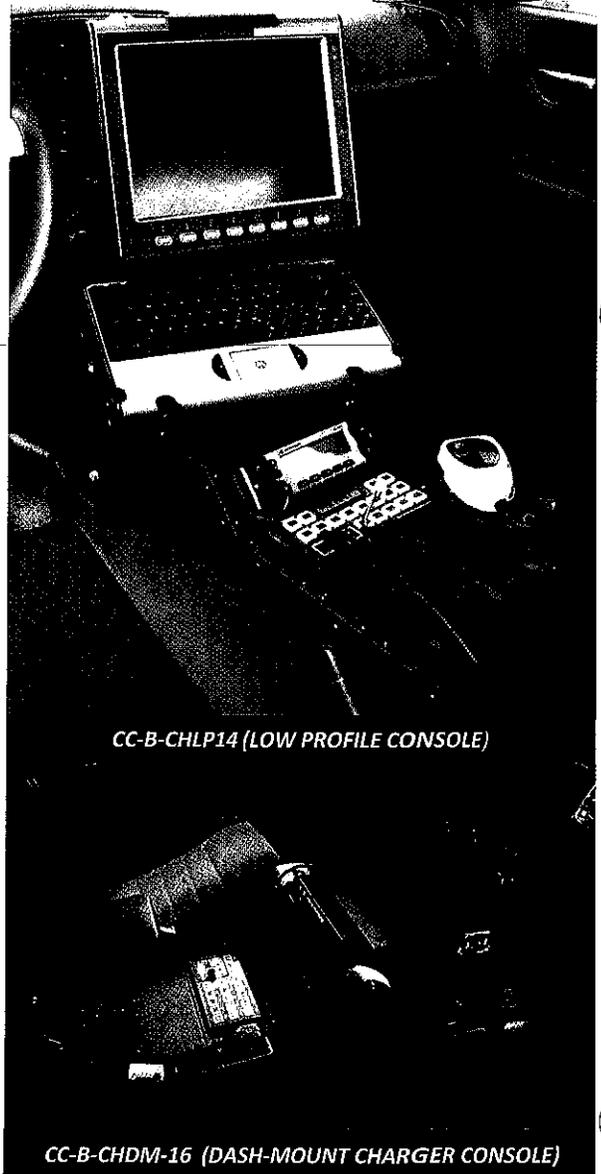

TROY also offers a Charger-specific floor plate, AC-CH11MNT. Use it with almost any TROY console in the Charger. An ideal choice if you prefer to transfer equipment to different vehicles.

Some non-vehicle-specific consoles used in Chargers are:

CC-A-S12 (2-pc. height adjustable), CC-BPD-15 (w/computer deck), CC-LP-14, CC-MC16-S, CC-PCFX14, CC-LASD-15 (low profile), and CC-HCSO-9 (sloped) and many others. You have a lot of choices. (See back of this sheet for more details.)

For computer mounting, use our U-mount or side mount designs. Both bolt directly to our heavy-duty consoles. You can choose between a 9" swing arm or a 9" sliding swing arm (max. 17" reach). Either arm works well as you create a low profile solution in your Charger.

Call Customer Service for part numbers for these and other Charger products (partitions, window guards, trunk trays and trunk organizers).

CC-B-CHLP14 (LOW PROFILE CONSOLE)

CC-B-CHDM-16 (DASH-MOUNT CHARGER CONSOLE)

TROY PRODUCTS

TAHOE WIDE-BODY CONSOLES

Fills entire space between seats and helps keep your vehicle looking neat!

TROY's Tahoe wide-body consoles are 12.36" wide (OD). This width includes our standard face plate mounting area (on driver side) plus an open storage area (on passenger side). The open area is 3.38" wide (ID).

Front side panels under dashboard create a clean, closed environment to hide wires, speakers, etc.

The front sloped area butts cleanly against dashboard. The OEM traction control switch easily re-locates to console. TROY provides two (2) power ports to replace OEM ports. The slope holds 7" of face plates. The level area is for face plates as well as items such as internal beverage holders, sunglass tray, storage compartments, etc.

Choose from two styles -- sloped and flat

- CC-TMCWB-16
- CC-TMCWB-20
- CC-TMCWB-25
- CC-TMCWB-30
- CC-TH22WB (flat)
- CC-TH25WB (flat)

An ideal console choice for those who routinely use map books, 3-ring binders, file folders, clipboards, etc.

TROY also offers a flat (non-sloping) wide-body Tahoe console. Choose the look that's right for you.

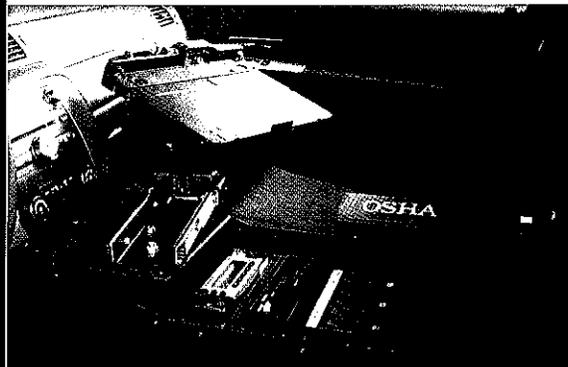

Compatible computer mounts for a Tahoe are:

- Console-insert type (bolts into sloped FP area)
- Side sliding mount (bolts to side of console)
- Passenger seat mount (bolts to seat bolts)

Call to discuss the best solution for a Tahoe. All Tahoe consoles also work in Suburbans.

NEW! TROY PRODUCTS 2014 CHEVROLET CAPRICE CONSOLES

CC-CP-E-DM18. Dash mount design. Use this console to install one full-length radio in the 3" sloped area at dashboard. Some cutting of OEM plastic trim is required. Use balance of mounting space only for remote heads and low-profile accessories (beverage holders, lock boxes, shallow trays, etc.)

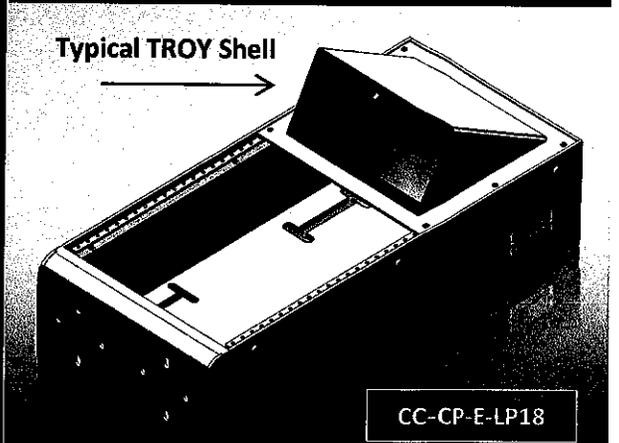

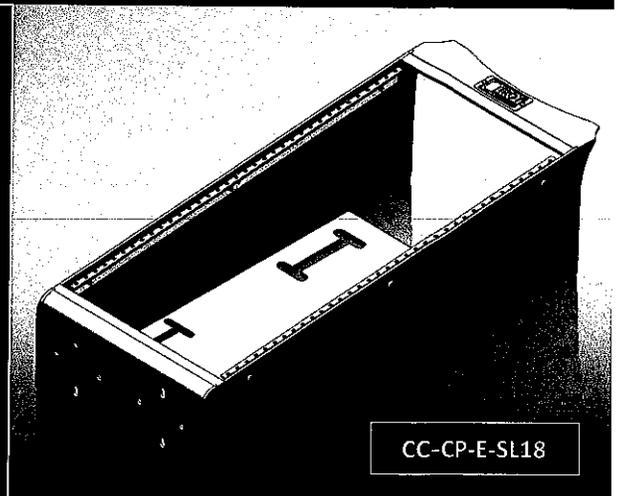

CC-CP-E-SL18. All sloping design. Use only remote heads. Sloped design eliminates need to cut dashboard plastic trim. Will also accommodate TROY low-profile accessories.

CC-CP-E-LP18. Flat, low profile design. Choose among many "shell" designs (sold separately) to install long components in this shallow console. See drawing at bottom right to see how a Troy custom-designed shell bolts to console face plate rail.

Using a TROY shell to fit a variety of radios, sirens, light bar controllers, DVRs, or a combination thereof, gives you more flexibility to fit components in the shallow area between the seats. Shells also can be used to tilt remote heads for better view.

The above models represent three different mounting approaches for the new 2014 Caprice. Each offers 18" of face plate mounting, but shorter *and* longer models also are available.

Call customer service for part numbers, prices and availability.

TROY PRODUCTS IMPALA CONSOLES

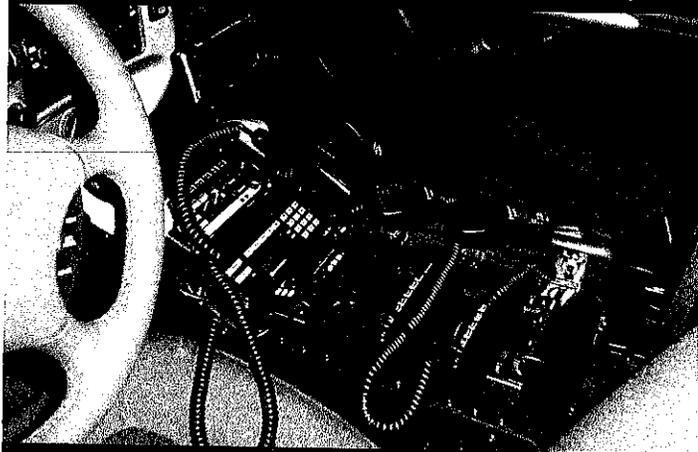

Sturdy, good-looking designs!

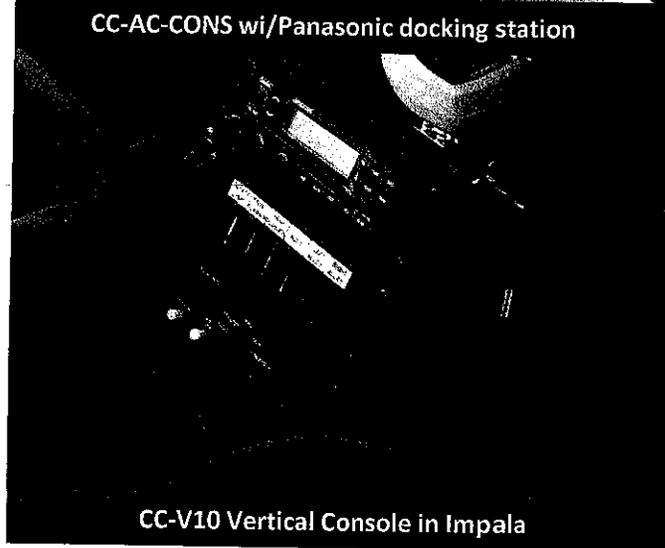

CC-A-S12 Console w/AC-BH95 beverage holder in Impala

CC-AC-CONS wi/Panasonic docking station

CC-MC-18 Console

CC-V10 Vertical Console in Impala

One of the most versatile console models for an Impala is the CC-A-S12 (pictured above). The dashboard end is flat to work with our U-shape computer mounts and has enough side wall surface to use our side-mounted solutions. The console is a two-piece design to allow you to raise just the top piece as much as 4" to accommodate varying equipment heights.

An optional low-profile 8" add-on console, CC-LP-8, is a great place to put internal beverage holder, sunglass tray, or remote head units. With the CC-LP-8, the entire console assembly has 20" of face plate mounting space.

There are many solutions for your Impala. Please call Customer Service to choose the right console for your application!

CC-FHD11-20 IN 2011 FORD F250 TRUCK

Wide-Body Consoles for Custom Look

TROY PRODUCTS designs and builds custom consoles for use in the Ford Heavy-Duty truck models – F-250 through F-550. Ideal for Battalion Chief and supervisor vehicles.

Consoles are available to fit 4x4 floor-shift models, too.

The console is 13.25" wide (OD). Face plate mounting is centered and leaves surface area on both sides for mounting mics on top (as pictured left). The wide body fills up the space between seats to make the look custom. We include a dashboard plate to which the console bolts.

FLOOR-SHIFT COMPARTMENT
